

The TFT is a compact lift designed to raise LCD monitors from furniture or lower from cabinetry. This lift can be fabricated in two-inch larger increments to accommodate larger monitors.

- Two popular configurations:
  - Raise up from within furniture
  - Lower down from ceiling or cabinet
- Travel distances - 14" and 20"
- Two positions: stowed and show
- Programmable show position
- For LCD monitors or cameras
- Unit mounts to underside of furniture leaving clear "knee space" for optimum viewing
- Quiet, smooth operation
- Includes wired hand-held remote
- Spill Guard
- Optional protective lower housing and camera shelves available
