EAGLE® PT-CC CONTROLLER

Eagle™ system compatible

On board microprocessor controlled

Convenient desktop form factor

Bright red LED's for user feedback of system status

When used in conjunction with required PT-C pan-tilt controller, the combination provides complete camera and pan-tilt system control

Use of EPROM's allow easy future software upgrades

Can control up to 32 cameras on one RS-485 control chain (when attached to required PT-C)

DB-9 type connector on rear allows for simple connection to PT-C controller

All needed connectors are included

The EAGLE™ PT-CC camera controller is a multi-functional control unit. It allows the user to control up to 32 different cameras attached to EAGLE™ pan tilt heads, from one controller. The PT-CC camera controller **must** be used in conjunction with the EAGLE™ PT-C joystick controller.

The PT-CC's compact desktop case allows it to easily be integrated into new or existing control room applications.

The PT-CC uses individual control buttons, with excellent tactile feedback. All of the main setup features for Hitachi's cameras are available to the user from the PT-CC. Detailed adjustment of camera timing, red and blue gain, overall gain and many other features are controllable from the panel. With most of the Hitachi cameras, the on-screen menu of the camera may be accessed, allowing visual selection and confirmation of changes.

SPECIFICATIONS

Weight: 3.0 pounds (1.4 kg)

Attaches to PT-C controller via included DB-9 cable

Requires no external power--draws all power from the PT-C controller

DIMENSIONS

10.25"W X 8.00"D X 4.25"H

ACCESSORIES

PT-C desktop pan tilt controller (required)
